

## SoftNAS Fact Sheet

<b>Company Overview:</b>	<b>Control Any Data. Any Cloud. Anywhere.™</b> SoftNAS®, Inc. is the #1 cloud data platform company and leading software-defined NAS provider for the cloud. Our mission is to be the fabric for business data in the cloud. SoftNAS provides a software-centric architecture that enables frictionless data management and control of any data, any cloud, anywhere. The SoftNAS cloud data platform and CloudFabric™ architecture provide customers a unified, integrated way to aggregate, transform, accelerate, protect and store data and to easily create hybrid cloud solutions that bridge islands of data across SaaS, legacy systems, remote offices, factories, IoT, analytics, web services, SQL, NoSQL and the cloud – any kind of data. SoftNAS provides the enterprise-class data security, protection, performance and high-availability required to safely, predictably, and reliably operate IT systems and applications in the cloud. SoftNAS works with the most popular public, private, hybrid and premises-based cloud operating systems, including Amazon Web Services™, Microsoft® Azure™ and VMware vSphere®.
